Dhaka, Bangladesh | **Mobile:** 01799949729 | **Email:** sadiazaman0917@gmail.com

LinkedIn: [linkedin.com/in/sadia-zaman-515a7a346](https://www.linkedin.com/in/sadia-zaman-515a7a346)

Objective

Passionate about **Data Analysis and Machine Learning**, skilled in **Python, SQL, Power BI, and predictive modeling**. Seeking an **internship or research opportunity** to apply and expand my ML and AI knowledge through real-world, data-driven projects.

Education

Master (Professional) of Science in Information Technology (Ongoing)

Jahangirnagar University, Savar | Currently in 3rd semester | **CGPA:** 3.94

- **Thesis Project:** *Serenity – Multimodal Depression and Anxiety Detection with a Supportive Chatbot* (Running)

Bachelor of Science in Computer Engineering

United International University, Dhaka | **Graduation:** February 2024 | **CGPA:** 2.93 (out of 4.00)

- **Relevant Coursework:** AI, Data Structures & Algorithms, Database Management, Software Engineering, Computer Networks

Higher Secondary Certificate (HSC)

Willes Little Flower School and College, Dhaka — 2018 | **GPA:** 4.33 (Science)

Secondary School Certificate (SSC)

A.K. High School and College, Dhaka — 2016 | **GPA:** 4.89 (Science)

Skills

Top Skills:

- Python | Machine Learning | Data Analysis

Technical Skills:

- SQL | Power BI | Pandas | NumPy | Scikit-learn | Data Cleaning | Data Visualization | Predictive Modeling

Additional Skills:

- Deep Learning | NLP | Sentiment Analysis | Research | Statistical Analysis | Problem-Solving

Tools & Libraries:

- TensorFlow | PyTorch | Matplotlib | Seaborn | Git/GitHub | HTML/CSS/React.js (basic) | MySQL | MongoDB
-

Projects

Serenity – Multimodal Depression & Anxiety Detection (Thesis Project)

- Built a text+audio-based emotion detection system using **DistilBERT** and **Wav2Vec2**.
- Developed a simple supportive chatbot with rule-based responses.
- Created an interactive interface using Streamlit for user input, predictions, and visualization.

Weather Detection System

- Developed a **machine learning-based weather prediction model** using Python.
- Focused on **data collection, preprocessing, and predictive modeling** with Pandas, NumPy, and Scikit-learn.

Protibeshi – Neighbor-Friendly Lending Platform

- Built a **web application** using **React.js, Node.js, and MongoDB** to promote community resource sharing.
- Contributed to **UI design, backend development, and user research**.

Certifications

- **Data analysis** — 10 Min School (SheSTEM)
 - **Full-Stack Web Development (MERN)** — Ostad
 - **Machine Learning for Everyone** – Coursera (2024)
 - **5-Days AI Agents Intensive course with Google** (2025)
-

Extracurricular Activities

- **BD Clean Volunteer** — Participated in community clean-up initiatives (2019)
 - **Mojar School Volunteer** — Assisted in donation drives for underprivileged children (2021)
 - **Computer Club (UIU)** — Engaged in coding and knowledge-sharing activities
 - **Rope4 Adventure Course** — Participated and volunteered in outdoor leadership and navigation training
